

## PSP Practice Exam

The following items once appeared on the PSP exams but have now been retired. Only select ASIS Certification Team members and our volunteer subject matter experts have access to the exam items; therefore, this is the **ONLY** place in which you will see “real” exam items.

Items are retired for many reasons including the information is no longer valid, the item has been used too many times, the item didn’t pre-test well, or the item was replaced with a more current item. **Use this practice exam to familiarize yourself with how the exam items will appear on the exam.**

### Domain 1: Physical Security Assessment

1. Which of the following assets should be included in a company’s vulnerability and threat identification survey?
  - A. Employee property
  - B. Contractor property
  - C. Leased property
  - D. Landlord property
2. Three key elements used in determining an asset’s value are:
  - A. the asset’s cost, publicity value to a specific threat group, and difficulty or time for replacement
  - B. user criticality, difficulty or time for replacement, and some measure of relative value
  - C. the asset’s cost, replacement value, and useful life
  - D. the asset’s cost, user criticality, and value to a specific threat group
3. Which of the following factors, besides relative value and criticality, is considered when determining asset value?
  - A. Net value
  - B. Loss expectancy
  - C. Replacement value
  - D. Location

### Domain 2: Application, Design, And Integration of Physical Security Systems

4. A defense contractor’s security officer has been directed to secure classified documents. Which of the following types of combination lock is required to accomplish this?
  - A. Group I
  - B. Alarmed
  - C. Group II
  - D. Time-delay
5. The purpose of an exclusive stand-off zone is to:
  - A. establish inner and outer perimeters for vehicle access
  - B. permit truck access only
  - C. prevent pedestrian access
  - D. permit only searched or cleared vehicles to have access

6. In the event of an emergency evacuation, it is most important for assembly areas to be:
  - A. preselected and well known to personnel
  - B. located in an area accessible to responders
  - C. large enough to hold the building occupancy plus 10%
  - D. in an area removed from all hazards

### **Domain 3: Implementation of Physical Security Measures**

7. Which of the following is a federal statute that grants access to public documents?
  - A. Bank Secrecy Act (BSA)
  - B. Suspicious Activity Reporting Act (SAR)
  - C. Freedom of Information Act (FOIA)
  - D. Fair Credit Reporting Act (FCRA)
8. To avoid a CCTV-system resynchronization delay, the system designer must specify that:
  - A. timing signals are generated internally from a crystal clock, derived from the camera's alternating current power source, or supplied by an external signal source
  - B. all cameras are supplied by a common external (master) signal source or are powered from the same alternating current power source
  - C. all cameras are powered from the alternating current power phase and specify appropriate hardware for the design
  - D. timing signals are processed within the image-scan section of the CCTV cameras
9. For preventive maintenance to be effective, each piece of equipment to be maintained must have documentation that includes:
  - A. the mean time between failures (MTBF)
  - B. system performance reports
  - C. component failure rates
  - D. manufacturer specifications

#### Answer Key:

1. C
2. B
3. C
4. A
5. D
6. A
7. C
8. C
9. A
